Breakout Session III – Motivation (Salon 2)

Questions for Pascal J.W. van den Noort

- If the topics are fresh and highly innovative, does that not influence the length of my attention span?

No, it is a physiological thing; when the blood stops streaming and the currents in the brain go low, then attention span is at its end.

- Who does that work, managing all your great suggestions? You?

Yes, and my partners of course. Have a look at www.velomondial.net www.susta-info.net <http://spicycles.velo.info>

- Have you heard of 'open space' meetings?
No

- Air- conditioned cycling path? Can you tell me more? How does it work? How long is that path?

35 kilometres long: have a look:
